

What can I do as an entrepreneur to protect my staff and customers during **the period of viruses?**

Allow your staff to work from home when necessary

Try to find a way to allow workers returning from a risk area to remain at home for 14 days

Provide the customary hygiene and disinfectant products on the premises of the company as well as in public areas

Notify staff and customers of hygiene requirements

Notify posted workers of potential risks and dangers and remind them of the regular hygiene requirements

When you have a health concern, you can contact your GP or the GP helpline **1220, +372 634 6630** when calling from abroad

If necessary, the call will be redirected to the emergency line **112**
