What can I keep in mind when attending and organising events during the period of viruses?

- Seriously consider whether attending or organising the event is absolutely necessary.
- If elderly or with a chronic illness, avoid attending public and major events.
- As an organiser of an event, you are responsible for making sure that people have the possibility of disinfecting their hands.
- It is wise to consult with a local healthcare provider before the event and agree on how to react to suspected cases of illness.
- Make sure that the surfaces of the bathroom, including the rubbish bin and the taps, are disinfected on a daily basis.
- When you have a health concern, you can contact your GP or the GP helpline 1220, +372 634 6630 when calling from abroad.
  - If necessary, the call will be redirected to the emergency line 112.
